

## FACT SHEET

# Mobile Nursing: A Global Mobile Healthcare Provider Network.

The healthcare landscape has changed, and mobile healthcare is now an integral part of clinical research. Beyond nursing, mobile healthcare must deliver more – compassion, accessibility, and a range of services that reduce patient burden while improving retention.

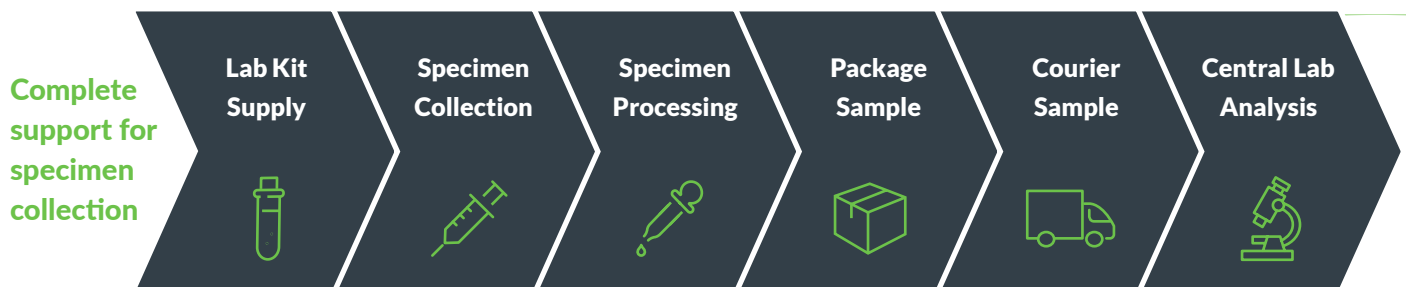

Delivering **research-grade mobile healthcare by highly trained professionals with a wide array of specialized skills following standardized procedures**, backed by expert telemedicine investigators and an industry-leading technology platform, Science 37 transforms clinical research by expanding accessibility and reach.

### Uniform Process

Science 37 mobile nurses are specialty-trained to complete procedures and capture data within the participant’s home. All nurses complete a **mandatory, comprehensive training program** with remote and in-person activities, and they follow a **single global SOP** for a participant-focused, consistent and scalable experience. All data collected within the Science 37 mobile technology platform is **available in real time**.

### Extensive Capability

Science 37’s mobile healthcare provider network offers comprehensive, in-home capabilities for **data collection** that’s **on-demand, flexible** and **customized** for study requirements. This includes collection of vitals and endpoints, blood draws and processing, the facilitation of physical exams, ECGs, Investigational Product Management (IMP) administration, and more – all under the investigator oversight.

## A Global Mobile Network

Science 37's team is positioned to support each study protocol with a network of credentialed, experienced, and trained mobile healthcare providers. Paramount to our model is participant-centricity where we strive to make it simple and comfortable for participants and their caregivers to take part in the study. Science 37 has been a provider of home healthcare services in the U.S. since 2014 and added an international nursing service division in 2020.

## End-to-end Technology that Streamlines Processes

With a team collaborating within Science 37's centralized, mobile platform, mobile nurses and healthcare providers can efficiently capture and upload data in real time to provide the most comprehensive, quality patient care and data integrity possible, in adherence with study protocol.

## Support for Physical and Neuro Exams

### Physician-guided Telemedicine Exams

- Physician investigator conducts the exam remotely by instructing mobile nurse, in accordance with American Telemedicine Association Guidelines
- Mobile nurse acts as the hands, eyes and ears of the physician investigator – conducting the exam by their instruction
- Real-time documentation via the Science 37 Technology Platform

### In-house Specialists

Science 37 has our own in-house physician specialists experienced in both brick-and-mortar and virtual clinical trials, board-certified in:

- Internal Medicine
- Family Medicine
- Emergency Medicine
- Neurology
- Psychiatry
- Oncology
- Dermatology
- Respiratory

LET'S TALK

Accelerate your clinical research with the agile clinical trial pioneers.

### About Science 37

Science 37, Inc.'s (Nasdaq: SNCE) mission is to enable universal access to clinical research, making it easier for patients and providers to participate from anywhere. Since 2014, we've pioneered decentralized and agile clinical trial approaches and having conducted more than 125 agile clinical trials, we're helping forge the future of research. The Science 37 Operating System (OS) supports today's more agile clinical research design, enabling up to 15x faster enrollment, 28% better retention, and 3x more diverse patient population. To learn more about our solutions, and how we can help you implement Agile and Decentralized Trials, visit [www.science37.com](https://www.science37.com), or email [science37@science37.com](mailto:science37@science37.com).
